

NA-MIC

National Alliance for Medical Image Computing

<http://na-mic.org>

NA-MIC Overview

Sonia Pujol, Ph.D.

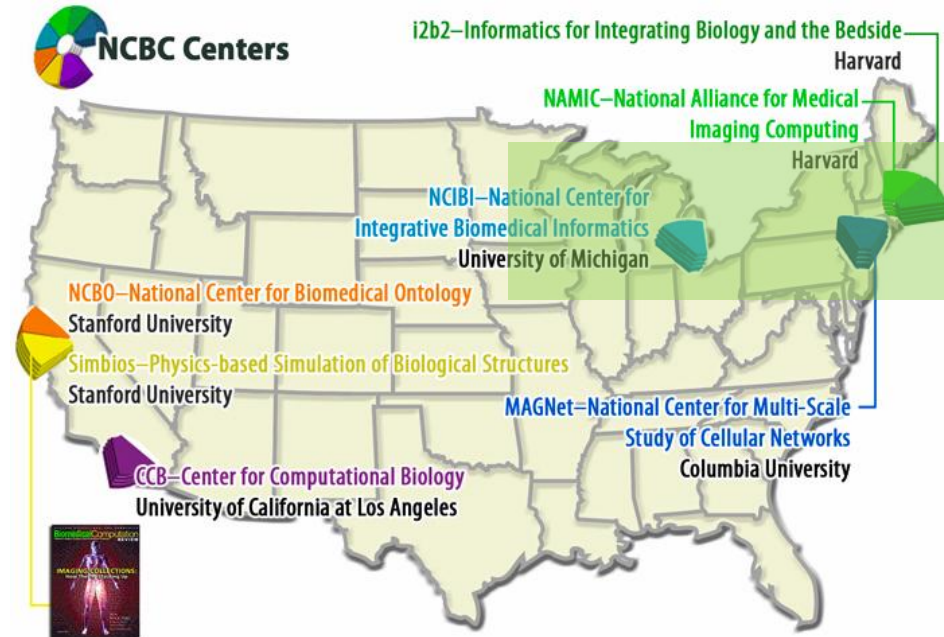

Surgical Planning Laboratory
Harvard University, Boston USA

What is NA-MIC

- National Alliance for Medical Image Computing
 - www.na-mic.org
- P.I: Prof. Ron Kikinis
Director, Surgical Planning Laboratory
- NIH Funded Center
 - National Center for Biomedical Computing (NCBC)
 - www.ncbcs.org

NA-MIC's Focus

- Medical Image Computing for personalized medicine
 - Run on your computer
 - Fast processing (clinical research)
 - Subject-specific analysis (pathology)

Our Approach

- Open community process
- Modular and extensible software architecture
- Free open source software (BSD license)
- Works on your computer

Picture courtesy Gabor Fichtinger

Open Community Process

- Participation from
 - Multiple institutions
 - Different disciplines
- Open to all: academia, industry, government, international
- Focused workshops (Diffusion MRI, Image-Guided Therapy)

NA-MIC Bi-Annual Project Week

Winter: Salt Lake City, Utah, USA

Summer: MIT, Cambridge MA, USA

Photo from the NA-MIC 10th Project Week – June 21-25, 2010

The NA-MIC Software ToolKit

Free Open Source Software (FOSS)

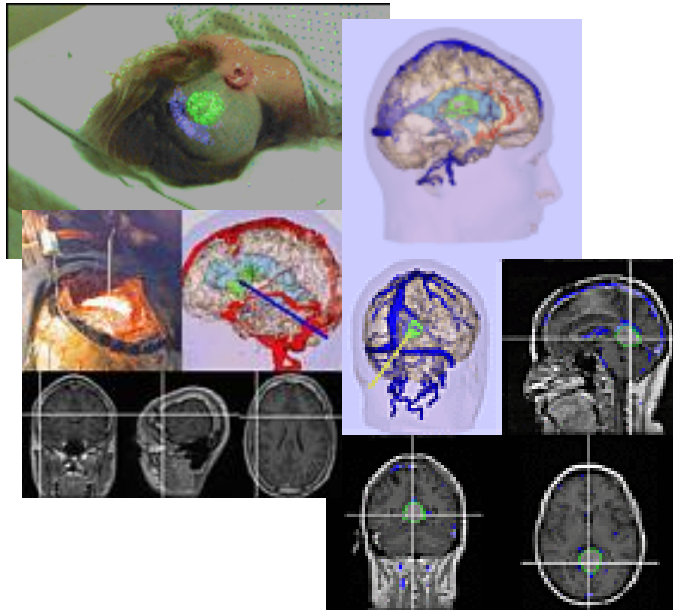

The 3D Slicer

- 3D Slicer is our primary platform for delivering image computing technology for personalized medicine research
- 3D Visualization and post - processing
 - Basic and clinical visualization
 - Longitudinal imaging
 - Registration
 - Segmentation

The 3D Slicer History

- Started in 1997 between the Surgical Planning Lab (Harvard) and the CSAIL (MIT)

Image Courtesy of the CSAIL, MIT

3D Slicer History

- Started in 1997 between the Surgical Planning Lab (Harvard) and the (CSAIL) MIT
- 2010: Multi-institution effort to share the latest advances in image analysis with clinicians and scientists
- 2.8 million lines of code

Slicer3.6 release version

- An **end-user application** for image analysis available on Mac, Linux and Windows
- An **open-source environment** for software development
- A software platform that is both **easy to use for clinical researchers** and **easy to extend for programmers**

NA-MIC

National Alliance for Medical Image Computing

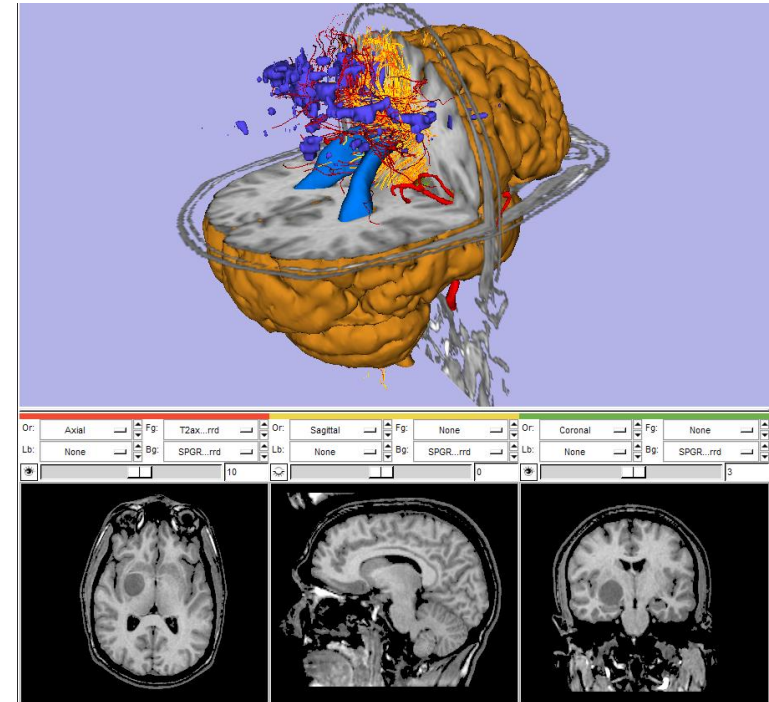

<http://na-mic.org>

***Three ways
to use the NA-MIC kit***

The NA-MIC kit from three user perspectives

- Clinical researchers
- Biomedical engineers
- Algorithm developers

Clinical researchers

***Interact in 3D to
enhance data
interpretation***

Visualize

Image from the SPL-PNL Brain Atlas
Talos IF, Jakab M, Kikinis R, Shenton
ME

- User-driven views of anatomical structures
- Overlay between 2D grey-levels images and 3D anatomical structures
- Intuitive interaction with the 3D models

Biomedical Engineers

***Extract relevant
information from
complex data***

Analyze

Image courtesy of Mahnaz Maddah, MIT

- Advanced analysis of complex data

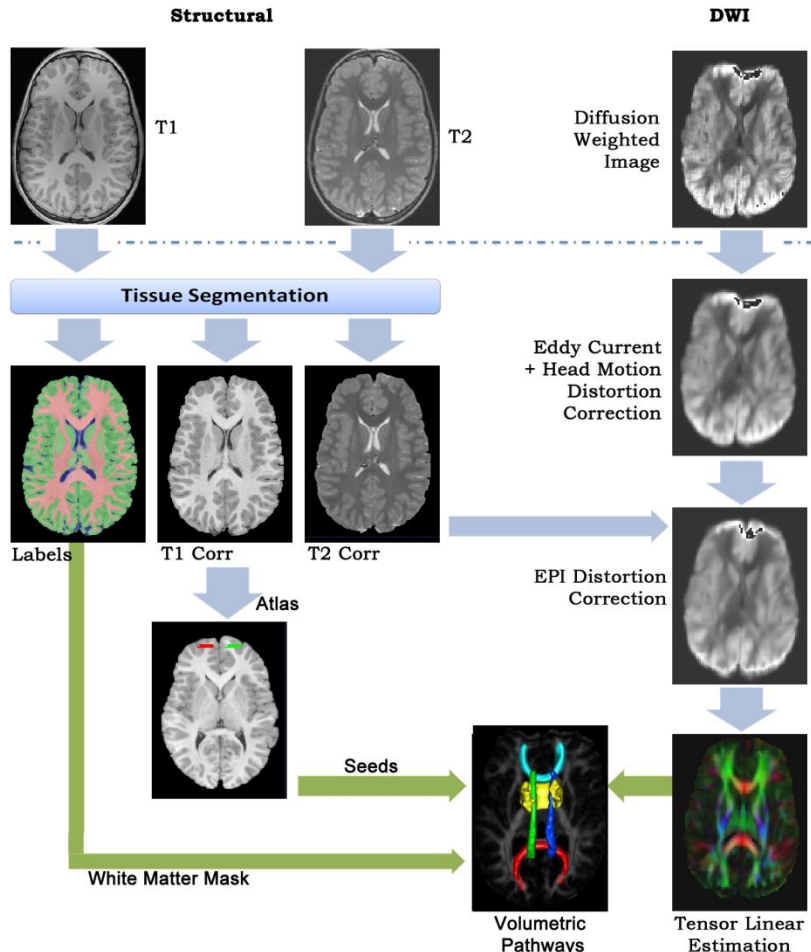

- Multimodal data fusion

- Clinical parameters extraction

Analyze

Statistical Analysis of Anatomy from Medical Images

Courtesy of Tom Fletcher, University of Utah.

Algorithm Developers

$$\ln p(X | \pi, \mu, \Sigma) = \sum_{n=1}^N \ln \left\{ \sum_{k=1}^K \pi_k N(x_n | \mu_k, \Sigma_k) \right\}$$

$$p_j^{(k)} = \frac{\sum_{i:D_{ij}=1} W_i^{(k-1)}}{\sum_i W_i^{(k-1)}}$$

$$q_j^{(k)} = \frac{\sum_{i:D_{ij}=0} (1 - W_i^{(k-1)})}{\sum_i (1 - W_i^{(k-1)})}$$

(a)

(b)

```
#include "itkDiscreteGaussianImageFilter.h"
```

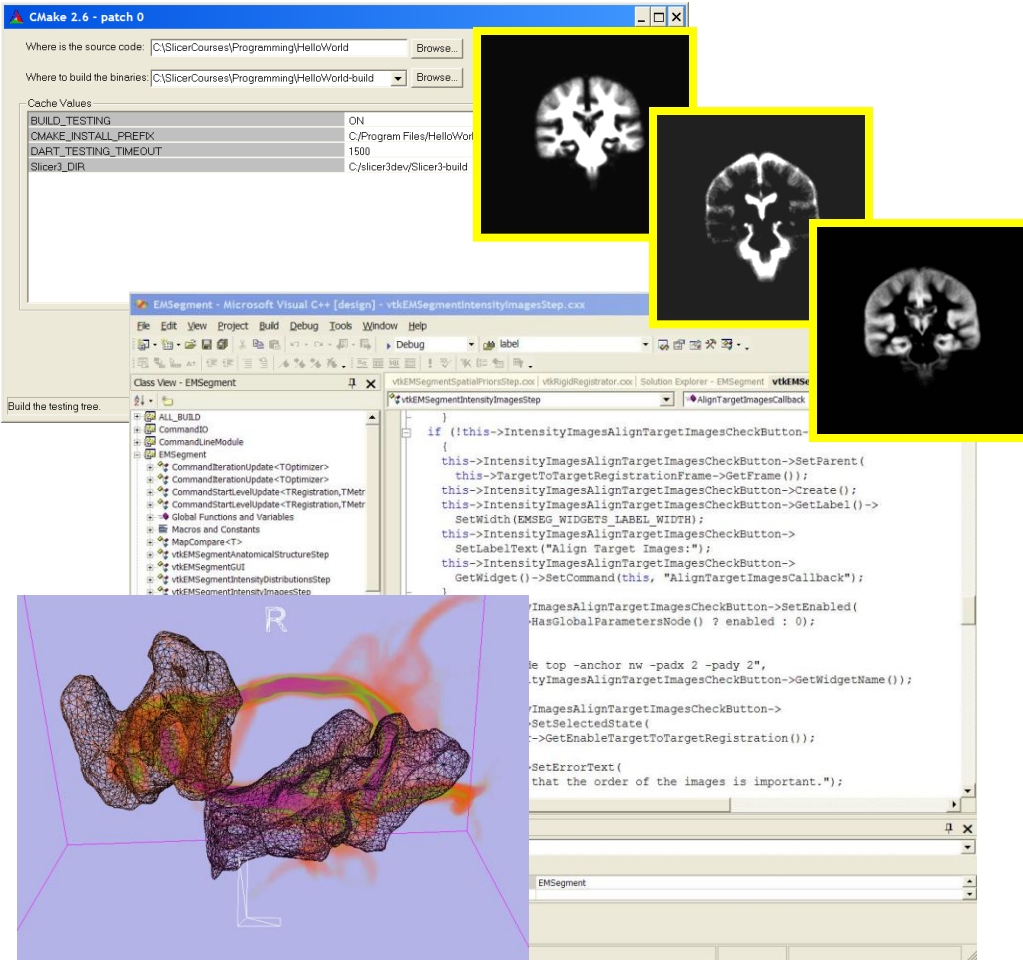

```
int main ( int argc, char * argv[])
```

```
{
    PARSE_ARGS;
    typedef itk::Image< short, 3 > ImageType;
    typedef itk::ImageFileReader< ImageType > ReaderType;
    typedef itk::ImageFileWriter< ImageType > WriterType;
    ReaderType::Pointer reader = ReaderType::New();
    WriterType::Pointer writer = WriterType::New();
    reader->SetFileName( FilterInputVolume.c_str() );
    writer->SetFileName( FilterOutputVolume.c_str() );
    typedef itk::DiscreteGaussianImageFilter< ImageType, ImageType > FilterType;
    FilterType::Pointer filter = FilterType::New();
```

Develop plug-ins to extend image analysis capabilities

Create

- Integrate external executables with the Slicer3 platform

- Develop plug-ins in C++, Tcl or Python

- Build upon the NA-MIC kit to meet your scientific goals

Clinical researchers
Biomedical engineers
Algorithm developers

***Translate
techniques
into skills***

NA-MIC Compendium

**Slicer 101 pages
1500 tutorial slides
on 22 different
topics in medical
image analysis**

NA-MIC Workshops

2005-2010: More than 1,000 scientists and clinical researchers trained by NA-MIC

Slicer: A Technology Delivery Platform

- Integrated solution for delivering technological breakthroughs to the clinical research community
- Practical aspects: Open-source and available on all major computer platforms

Slicer in Image Guided Therapy

- To facilitate application of state-of-art medical image processing in IGT
- Extension of open source concepts to IGT, including hardware

National Center for Image-Guided Therapy, www.ncigt.org

Surgical Navigation and Robotics Laboratory

Intelligent Surgical Instrument Project, Japan

Example: Clinical Case Image Guided Neurosurgery

- **Patient specific analysis**

- Where are important structures in the vicinity of the tumor?
- Grey matter function, white matter tracts
- Research in a clinical setting

Golby, Pieper, Lemaire, BWH Neurosurgery

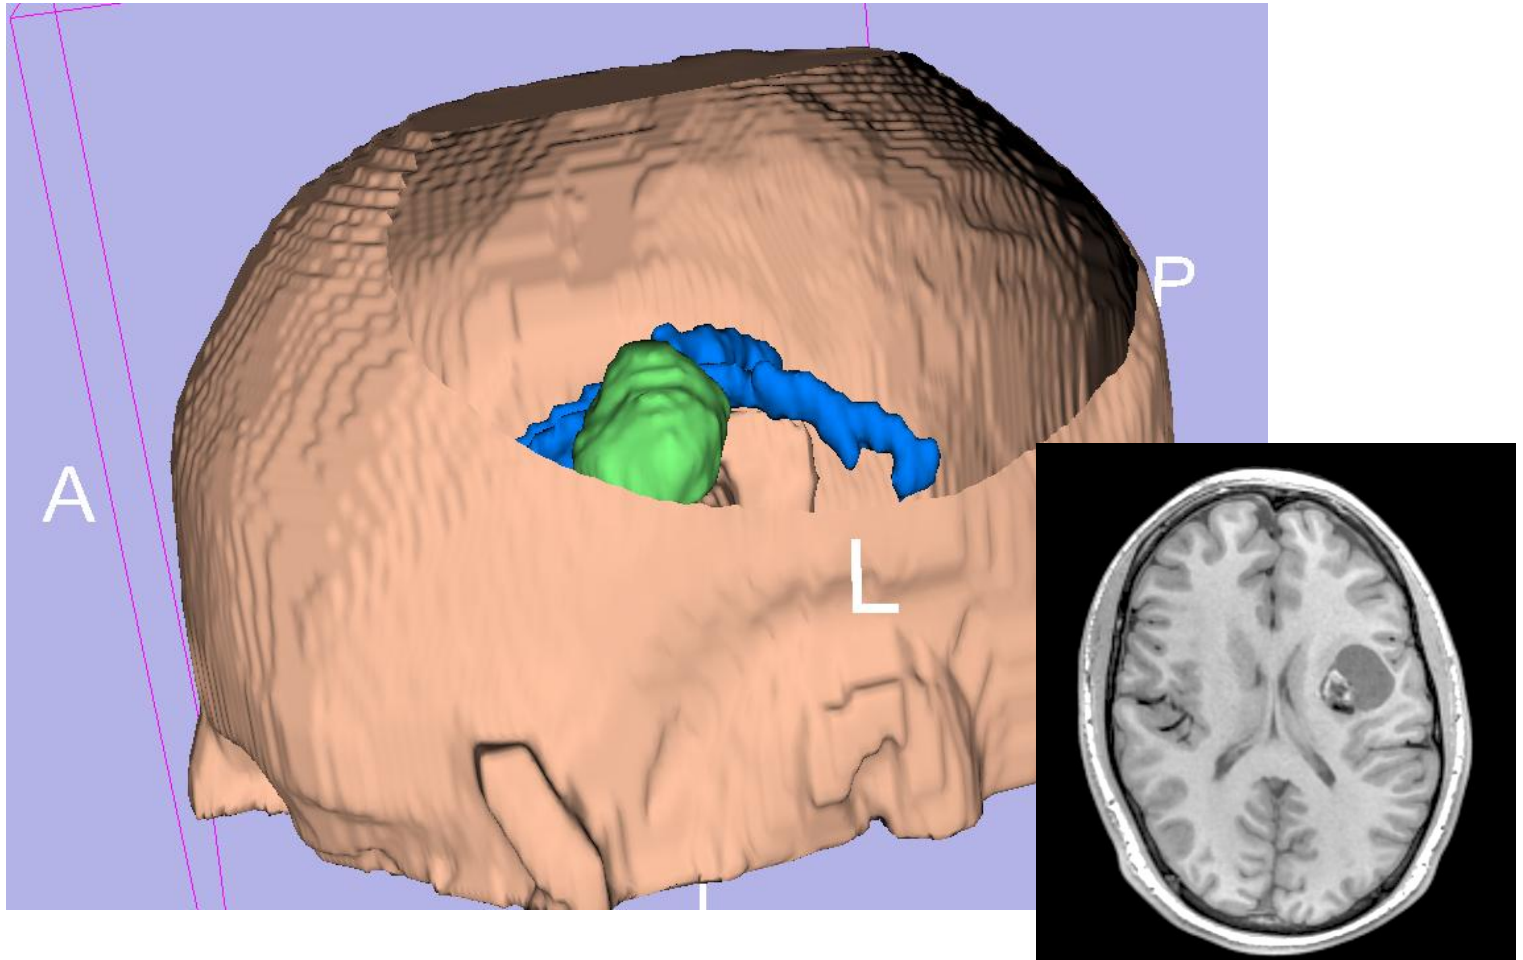

Example: A Clinical Case

- Right handed male patient, 20 years old
- Scan of the head after sport trauma (MR T1 and T2 Weighted images)

A Clinical Case: Overview

A Clinical Case: White Matter

A Clinical Case: Peritumoral Tracts

A Clinical Case: Virtual Probing

NA-MIC's Science

- Algorithm research
- Tool development
- Biomedical Research
