MEDICINE

Description

Over the past two decades image-guided therapies have expanded into every organ system and disease state. Interventional MRI has become vital to current multimodality image-guided therapies and also provides an entirely new platform for novel therapies. In light of the rapid developments in the field and due to the success of the 10th Interventional MRI Symposium 2014 in Leipzig, we would like to cordially invite you to attend the 11th Interventional MRI Symposium 2016 in Baltimore, Maryland, USA.

The Interventional MRI Symposium is a cutting-edge platform for researchers, clinicians, and other health-care specialists to present their latest results and interact with international leaders and innovators in the field. The current program will be composed of lectures from both invited speakers and proffered papers. We encourage all professionals working in the field of interventional MRI to submit scientific abstracts to this symposium.

Who Should Attend

This activity is intended for MRI radiologists, interventional radiologists, MR researchers, cardiologists, minimally-invasive surgeons, neurosurgeons, technologists, and nurses.

Objectives

After attending this activity, the participant will demonstrate the ability to:

- Integrate safety protocols for interventional MRI into clinical practice.
- Define new clinical applications for interventional MRI.
- Recognize basic systems available for interventional MRI.
- Explore new technologies available for interventional MRI.
